

Astro App (Web + Mobile Application) – Detailed Project Overview

1. Introduction

The Astro App is a comprehensive digital astrology platform designed to deliver both automated and real-time astrology services. The platform enables users to generate personalized Kundali reports, perform compatibility matching, and connect with professional astrologers through chat, voice calls, and video consultations.

The system will be developed as a complete ecosystem consisting of:

- User Application (Web + Mobile)
- Astrologer Application (Mobile)
- Admin Panel (Web)

The application aims to digitize traditional astrology services and transform them into a scalable, revenue-driven platform with multiple monetization models including report purchases and per-minute consultation billing.

2. User Application (Customer Side)

2.1 User Registration & Profile Management

Users will be able to register and log in using mobile number or email with OTP-based authentication.

The platform will collect essential details such as Name, Date of Birth, Time of Birth, and Place of Birth, which will be used for astrology calculations.

Users can manage their profile, update personal details, and store multiple profiles for family members if required.

2.2 Kundali Generation

Users can generate a complete Janam Kundali by entering their birth details. The system will process this information using astrology APIs or custom-built logic.

The output will include:

- Detailed Kundali charts
- Planetary positions and doshas
- Personalized astrological insights
- Downloadable PDF reports
- Screen-based report viewing

2.3 Kundali Matching (Matchmaking)

The platform will provide compatibility analysis between two individuals.

Key outputs include:

- Gun Milan Score
- Compatibility breakdown
- Strengths and weaknesses of the match
- Detailed matchmaking report (PDF + screen view)

2.4 Astrologer Marketplace & Consultation

Users will be able to browse and connect with astrologers through a built-in marketplace.

Astrologer Discovery

- View astrologer profiles
- Filter by expertise, language, price, and rating
- Check availability (Online/Offline status)

Consultation Modes

- Live Chat (text-based, per-minute billing)
- Voice Call consultation
- Video Call consultation

Session Features

- Real-time interaction
 - Session timer and cost display
 - Queue or instant connect system
-

2.5 Wallet & Payment System

The application will include a secure wallet-based payment system.

Wallet Features

- Add money via Razorpay, Stripe, or UPI
- Real-time balance updates
- Secure transactions

Billing System

- Per-minute deduction during chat/call/video sessions
- One-time payment for:
 - Kundali generation
 - Matchmaking reports

After successful payment:

- Reports are unlocked
 - PDF download is enabled
-

2.6 Reports & History Management

Users will have access to:

- All generated Kundali reports
- Matchmaking reports
- Downloadable PDFs
- Order history (payments and purchases)

- Session history (chat, call, video logs)
-

2.7 Notifications System

- SMS and email notifications for transactions
 - Push notifications for:
 - Astrologer availability
 - Session updates
 - Offers and promotions
-

3. Astrologer Application (Dedicated Mobile App)

A separate mobile application will be developed specifically for astrologers to manage their services and interact with users.

3.1 Registration & Verification

- Astrologer sign-up with profile details
 - Upload KYC documents
 - Admin approval process
-

3.2 Profile & Pricing Management

- Set consultation price (per minute)
 - Define expertise and skills
 - Add languages spoken
 - Manage profile visibility
-

3.3 Availability Management

- Toggle Online / Offline status
 - Set working hours
 - Accept or reject consultation requests
-

3.4 Consultation Handling

Astrologers can manage sessions directly from the app:

- Real-time chat interface
 - Voice call handling
 - Video call sessions
 - Session timer and earnings tracking
-

3.5 Earnings & Wallet

- View total earnings
 - Track completed sessions
 - Wallet for payouts
 - Request withdrawals
-

3.6 Session History

- View past chats and calls
 - Access user interaction history
 - Performance insights
-

4. AI Engine (Core Logic)

The backend system will include an intelligent processing layer responsible for astrology calculations and automation.

Core Capabilities

- Kundali generation based on birth data
- Horoscope and planetary calculations
- Matchmaking algorithm (Gun Milan)
- Automated report generation

Optional Enhancements

- Personalized recommendations

- AI-based astrology assistant (future scope)
-

5. Admin Panel (Web-Based)

A centralized admin panel will provide full control over the platform.

5.1 Dashboard

- Total users and astrologers
 - Total orders and revenue
 - Active sessions overview
-

5.2 User Management

- View and manage users
 - Track user activity and history
-

5.3 Astrologer Management

- Approve or reject astrologers
 - Verify KYC documents
 - Manage commission structure
 - Monitor ratings and performance
-

5.4 Payments & Wallet Management

- Track all transactions
 - Manage wallet balances
 - Configure commission percentages
 - Handle payout requests
-

5.5 Session Monitoring

- Monitor chat, voice, and video sessions
 - Maintain logs for quality and security
-

5.6 Reports Management

- Access all generated reports
 - Download or resend reports to users
-

5.7 Pricing & Configuration

- Set pricing for:
 - Kundali generation
 - Matchmaking
 - Configure platform commissions
-

6. Technology Scope (High-Level)

The platform will be built using scalable and modern technologies:

- **User Web Application:** Next.js (React)
 - **User Mobile Application:** React Native
 - **Astrologer Mobile Application:** React Native
 - **Backend APIs:** Node.js with Express.js
 - **Database:** MongoDB
 - **Payment Integration:** Razorpay, Stripe, UPI
 - **Real-Time Chat:** WebSockets / Socket.io
 - **Voice & Video Calling:** WebRTC or third-party services (Agora, Twilio)
 - **Authentication:** OTP-based login with JWT
 - **Hosting & Infrastructure:** AWS / Cloud-based deployment
-

7. Conclusion

The Astro App is designed as a complete digital astrology ecosystem that combines automated astrology services with real-time human interaction. By

integrating features such as Kundali generation, matchmaking, live consultations, and a dedicated astrologer app, the platform enables multiple revenue streams including report purchases and per-minute billing.

With scalable architecture and modern technologies, the solution is positioned for long-term growth, high user engagement, and expansion into a full-fledged astrology marketplace.
